

RIGID VINYL THROAT FILLER

Application:

The Steelcraft Throat Filler is made of extruded rigid vinyl:

- Sections supplied with double faced tape applied to the inside lip for installation on frame backbends
- Standard length of throat filler sections is 87" (2210mm) to ensure continuous sections that accommodate heights up to 7'-2" (2184mm)
- To be applied to the backbend(s) of frames after they have been installed on the wall
 - Jamb filler(s) are to be equal to the overall length of the jamb backbend
 - Head filler(s) are to be 1" (25mm) less than the overall length of the head backbend

Purpose:

When wall thickness is between 1/8" (3mm) to 1/4" (6mm) less than the frame throat dimension, throat filler section(s) can be used to fill the gap, assuring the proper amount of grip required to complete the installation.

Product Availability:

This optional frame component is available from factory inventory and is applicable to Steelcraft **Non-Labeled** DW and K Series frames.
